# EndoInspect®

PC-Based USB Lumen  
Inspection System

## NEW GENERATION SYSTEM

The next generation **EndoInspect® lumen inspection system** has evolved from a standalone monitor to a compact, high-performance PC-based USB inspection platform. This configuration leverages the latest CMOS imaging technology while maintaining full backwards compatibility with your existing EndoInspect scope inventory.

## System Features

### Seamless Integration

Plug-and-play USB connectivity for instant image and video recording via PC or laptop and the EndoInspect Viewer app.

### Digital Workflow

Leverages PC software for intuitive file organization, instant sharing, and comprehensive video review.

### High-Resolution Scopes

- High-resolution CMOS videoscopes available in **1.0 mm** and **1.9 mm** diameters.
- Industry-leading micro-fiberscopes at **0.5 mm** and **0.8 mm** diameter.

### Compatible PC Device Types

- Windows Desktop/Laptop/Notebook PC
- Windows Tablet with full Windows OS (e.g. Microsoft Surface Pro)
